

# COMMONWEALTH CLIMATE RESILIENCE NETWORK

**Connecting universities across borders to share knowledge, best practice, build climate resilience and develop solutions to climate change.**

- 240+ members in 110+ universities and 27 countries
- Led by Fiji National University, University of the South Pacific and the University of the West Indies, the network aims to build climate resilience within universities and their wider communities
- Links ACU member universities directly affected by climate change with those that have expertise in building resilience through regular events, webinars and activities
- A platform for universities to share experiences and coordinate collaborative activities related to climate resilience and disaster preparedness, including teaching and learning, research, institutional resilience and advocacy.

Members in  
**27**  
Countries

**13** CLIMATE  
ACTION

## **Recent activities include:**

- Commonwealth Climate Resilience Challenge Grants launched for university staff to fund climate action and environmental projects - 4 grants up to £2,500 each are available per annum
- Durham University-University of Cape Town Virtual Visiting Fellowship on climate resilient livelihoods
- Network members are currently co-developing a draft module outline for teaching climate resilience focusing on small island states to assist other universities with curriculum design
